- Feedlotting Lambs, Australian Farm Journal, 2003

San Jolly, applied ruminant nutrition consultant, commenced and established the business, Productive Nutrition Pty Ltd, in December 1999.

San is passionate about improving production sustainably and using best practice methods that are practical, achievable and that are cost efficient.

With many years experience gained from working with producers and other industry experts, managing her own property and stud flock together with her continuing interests in research, San has become sought after as a consultant as well as a presenter for key note addresses and workshops. San's presentations are recognised for their engaging, practical and unambiguous style.

San is currently completing her Masters degree in Ruminant Nutrition 'Improving the productivity of sheep grazing on immature pastures' to complement her Bachelor of Applied Science (Agriculture), completed at the University of Adelaide. San has completed a thesis entitled 'Water holding capacity of plant fibre may limit dry matter intake of sheep grazing immature pastures' and a research project investigating the effects of monensin sodium (Rumensin) on weight gains in dairy heifers.
